

PAARISHIV HOMES

Concrete Pouring Approval Format (CPA)

Project Code:

Project Name:

Location / Block / Floor:

Structural Member : (Footing/Column/Earth Beam/Plinth Beam/Lintel/Beam/Slab)

Date of Pouring:

Concrete Grade:

Mix Source (RMC/Batching Plant):

Quantity (Cum):

Sl. No	Item to be Checked	Status (OK/ Not OK)	Verified By	Remarks
1	Shuttering checked for line, level, plumb, dimensions, and stability.			
2	Formwork surface cleaned and coated with release agent			
3	Adequate supports, bracing, and safety platforms provided			
4	Bar bending verified with approved BBS and drawings			
5	Cover blocks placed correctly and of approved quality			
6	Reinforcement free from rust, mud, and oil			
7	Proper spacing, laps, hooks, bends, and ties provided			
8	Electrical conduits, sleeves, inserts fixed as per drawing			
9	Opening, embedment, and sleeves verified			
10	Safety check (Scaffolding, Working Platform, PPE)			
11	Shoe Marking casted properly and Height of column as per plan			
12	Lintel, Sunshade casted as per drawings

Quantity (Cum):

Sl. No	Item to be Checked	Status (OK/ Not OK)	Verified By	Remarks
1	Shuttering checked for line, level, plumb, dimensions, and stability.			
2	Formwork surface cleaned and coated with release agent			
3	Adequate supports, bracing, and safety platforms provided			
4	Bar bending verified with approved BBS and drawings			
5	Cover blocks placed correctly and of approved quality			
6	Reinforcement free from rust, mud, and oil			
7	Proper spacing, laps, hooks, bends, and ties provided			
8	Electrical conduits, sleeves, inserts fixed as per drawing			
9	Opening, embedment, and sleeves verified			
10	Safety check (Scaffolding, Working Platform, PPE)			
11	Shoe Marking casted properly and Height of column as per plan			
12	Lintel, Sunshade casted as per drawings

Quantity (Cum):

Sl. No	Item to be Checked	Status (OK/ Not OK)	Verified By	Remarks
1	Shuttering checked for line, level, plumb, dimensions, and stability.			
2	Formwork surface cleaned and coated with release agent			
3	Adequate supports, bracing, and safety platforms provided			
4	Bar bending verified with approved BBS and drawings			
5	Cover blocks placed correctly and of approved quality			
6	Reinforcement free from rust, mud, and oil			
7	Proper spacing, laps, hooks, bends, and ties provided			
8	Electrical conduits, sleeves, inserts fixed as per drawing			
9	Opening, embedment, and sleeves verified			
10	Safety check (Scaffolding, Working Platform, PPE)			
11	Shoe Marking casted properly and Height of column as per plan			
12	Lintel, Sunshade casted as per drawings

5	Cover blocks placed correctly and of approved quality			
6	Reinforcement free from rust, mud, and oil			
7	Proper spacing, laps, hooks, bends, and ties provided			
8	Electrical conduits, sleeves, inserts fixed as per drawing			
9	Opening, embedment, and sleeves verified			
10	Safety check (Scaffolding, Working Platform, PPE)			
11	Shoe Marking casted properly and Height of column as per plan			
12	Lintel, Sunshade casted as per drawings
