Painting Work Checklist (PWC)

Name of work:

Date:

Project Code:

MB Pg No:

Name of Contractor:

MB Serial No:

Location:

Item of Works covered:

Sl. No	Check Point	Status (OK/Not OK)	Remarks
1	Surface cleaned of dust, grease, loose particles, and laitance before painting		
2	All plastered surfaces cured and dried completely before painting		
3	Moisture content of wall checked – no dampness or leakage present		
4	Cracks and holes filled with approved filler/putty before primer		
5	Primer applied as per manufacturer's specification		
6	Putty applied in required coats for smooth finish		
7	Surface rubbed down with sandpaper between coats for smoothness		
8	Paint material approved make/brand as per project specification		
9	Shade, color, and texture of paint verified with approved sample		
10	Paint mixed/stirred properly before application		
11	Correct dilution of paint maintained as per manufacturer's instructions		
12	Number of coats as specified in drawings/BOQ (min. 2 coats)		
13	Each coat allowed to dry completely before next coat applied		
14	Uniform shade, finish, and coverage checked across surface		
15	No brush marks, roller marks, or patchiness visible		
16	Edges, corners, and junctions neat and sharp		
17	Protection provided to floors, doors, and fixtures before painting		
18	Scaffolding stable and does not touch painted surface		
19	Final surface smooth, even, and as per approved finish		
20	Touch-ups done wherever required and surface cleaned after work		
21	Adjacent areas protected by Masking tape wherever needed...
